DETAILED ACTION

1. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

“the disk” has no antecedent basis.

2. Claims 1, 2, 4-6, and 8-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Drebusenko (5501322). Drebusenko teaches a carrier system having a plurality of container tubes 12, a body member having a plurality of first openings 40, ridge members (the ribs in Fig. 2) provided with a plurality of second openings 16 wherein the first openings are adapted to receive and frictionally retain the container tubes therein and each container tube extends a distance from the body member when secured thereto.

Regarding claim 8, note the unit is resilient (col. 3, ln. 52).

3. Claims 1, 2, 4-6, and 8-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Jordan et al. (4960219). Jordan teaches a body member (fig. 2, portion having a cross section at defined by 4-4, right of numeral 8) with a plurality of 1st openings (note the openings on the surface 6 and opening defined by 20 in Fig. 4), a ridge member 2 with second openings (defined by portion 18 in Fig. 3), a plurality of container tubes and the tubes are removably securable to the body member (note that surface 18 is a guide for the tubes to be inserted into the opening).

4. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Link (6533151). Link teaches a body member, with a plurality of 1st openings 6 and 12, a ridge member being the surface of with second openings 28, and a plurality of container tubes and the tubes are removably securable to the body member.
